

ふたり イチ

There are numerous similarities to the Japanese.

Japanese apes love to bathe in hot springs in winter.

Hot springs with apes.

PART.198: Hot springs with apes

Shoko
(24),
erotic
novelist

A SECRET
HOT SPRING
THAT'S ALSO
USED BY APES!!

Rui (16),
student

HE SEEMS A
BIT DEPRESSED...
MAYBE THAT WILL
CHEER HIM UP.

I ALSO
WANT TO COME
LONG. I'LL ASK
DAD.

NICE IDEA!

LET'S GO
THERE!

MY BOYFRIEND
SURELY DOESN'T
WANT ME TO COME
ALONG...

And
Narumi
-chan...

I HAVE TO TAKE
CARE OF THE
CHILDREN!!

Mizuhara-san
would also like
to, but...

VERY STYLISH! A
HOT SPRING IN THE
MOUNTAINS!

WOW!

THEY'RE
NOT ALWAYS
HERE.

WHERE
ARE THE
ASPEN?

BE CAREFUL
NOT TO TRIP!

WOW! IT'S
REALLY HOT!

Why do apes grab the testicles of other apes?

WITH THE MACAQUES IT'S LIKE THIS: THE HIGHER RANKED GRABS THE TESTICLES OF THE LOWER RANKED TO INTIMIDATE HIM. FOR CHIMPANZES IT'S THE CONTRARY. THE LOWER RANKED GRABS THE TESTICLES OF THE HIGHER RANKED TO GREET HIM. (BY THE WAY, CHIMPANZES HAVE THE BIGGEST TESTICLES OF ALL GREAT APES.)

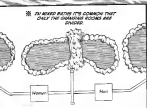

How is a macaque pack structured?

MATRILINEAL, PROMISCUOUS SOCIETY. IT MEANS THAT FEMALES SELDOM LEAVE THE PACK, WHEREAS MALES WAANDER FROM GROUP TO GROUP TO INTERACT WITH DIFFERENT FEMALES. (CHIMPANZEES HAVE A PATRILINEAL SYSTEM.) THERE ARE ALSO LOWERS THAT BELONG TO SMALLER GROUPS. IN PACKS THERE'S USUALLY A SENIORITY PRINCIPLE...

DON'T IT REMIND US OF THE JAPANESE SOCIETY?

And
Makoto-san...

WHAT? WHO
DO YOU MEAN?

HIS LOOKED
TOTALLY
DIFFERENT...

...Harumi-san's
breasts are firm and
she is strongly haired...

Rui-chan has
small breasts with
small nipples and has
hardly any hair...

So many
naked women
at once!

おっ

MAKOTO-SAN!

WAN!

And what
about
Shoko-san?

Awwwed!

I've always
liked to see
women naked!

Copulation length of great apes 38

ORANG-UTAN... APPRO. 10 MIN.
GORILLA... 1.5 MIN.
CHIMPANZEE... 7-8 SEC.
HUMAN SEX LASTS WAY
LONGER IN COMPARISON!!

SAN SPA

JAPANESE MACAQUES ORIGINALLY LIVED IN DECIDUOUS FORESTS IN THE MOUNTAINS. BUT THE FEEDING OF THESE ANIMALS IN SERVICE OF TOURISM LEAD TO THEIR ADAPTION OF LIFE IN TOWN AND LET THEM BENEFIT FROM THE CLOSENESS TO HUMANS. EVERY NOW AND THEN, THERE ARE REPORTS ABOUT DAMAGES BY APES.
